

FISITA

Promoting excellence in mobility engineering

The international membership organisation for the technology of mobility community

FISITA provides the platform for collaborative thought leadership which supports the world's automotive and mobility systems leaders and engineers to achieve their goals and push the boundaries of technology.

Blended engagement approach

The collaborative approach between FISITA and our international membership community, encompassing both digital and in-person engagement, drives the new era of FISITA. The strategic blend of digital and in-person interactions, coupled with a two-year work cycle between each World Mobility Conference, fulfills our members' needs. This approach supports meaningful connections and engagement, focusing on real-world challenges and opportunities for the technology of mobility industry. FISITA is leading the way in how engagement needed to evolve and adapt to meet the need of its community, creating a modern member-led organisation for the international technology of mobility leaders and engineers.

Digital engagement

Expert Groups convene frequently in the digital setting of FISITA, connecting members worldwide and delivering vital engagement—reducing time, travel, and expense.

Current Expert Groups

Battery Technology
Digitalisation
Intelligent Safety

Carbon Neutral Mobility
Industry Disruption
Circular Economy

Expert Groups in development

Advanced Chassis Technology
Automated Vehicles
Commercial Vehicles
International Value Chains

In-person engagement

We recognise the importance of in-person events and the need for the community to meet with the right people, for the right reasons, at the right time.

We have made a significant investment in our long-standing tradition: the FISITA World Mobility Conference, Barcelona, serving as the biennial flagship event for the global technology of mobility community.

To answer our members' and the community's expectations, FISITA organises the following subject specific events: the World Mobility Summit, EuroBrake, and the Intelligent Safety Conference in China. These immersive events take place during the World Mobility Conference and also independently, in alternate years.

FISITA Start-up Membership

At FISITA, we believe the technology of mobility is positively changing our world. We're here to support leaders and engineers in their quest to develop safe, sustainable, and affordable mobility solutions.

Our platforms create the environment for technical engagement and high level networking within our pre-competitive community, generating collaborative thought leadership, connecting stakeholders across the automotive and mobility ecosystem as they continue to push the boundaries of the technology of mobility.

Start-up membership fee at £3,000 includes:

- 2 year corporate membership of FISITA
- Poseur table space OR 50% discount for a limited number of 4sqm stands at the World Mobility Conference, Barcelona, Spain 3-5 June
- Discounted tickets for FISITA events, including complementary leadership attendance at the FISITA technical leaders event, the World Mobility Summit
- Opportunity to join the Expert Groups delivering peer group engagement, valuable dialogue, and tangible outcomes in the pre-competitive space
- Access to the Digital Library with 10,000+ items
- Opportunity to promote thought leadership pieces

Companies incorporated on or after 1/12/2022, revenue under £1m.
