

An introduction to membership

The global alliance advancing the technology of mobility

We are proud to lead FISITA during this exciting time for our industry, which continues its rapid year-on-year advancement with the international technical community delivering great strides forward, and the mobility systems of today and tomorrow delivering against the highest demands and expectations this industry has ever seen.

At FISITA, we are clear that our members are leading this journey forward with a shared vision for the purpose and work of our organisation, motivated by our mutual aspiration to create safe, sustainable, and affordable mobility.

We progress our role in this great industry, building on FISITA's 75-year legacy and achievements; and we do this by connecting an alliance of international industry leaders, engineers, and stakeholders to facilitate the advancement of the strategy and technology of mobility, for the benefit of industry, people, and planet.

Over the decades, FISITA has been utilised as an important international platform through which professionals connect with their peers and engage in highly relevant work within our unique, pre-competitive, member-led environment.

We believe your organisation could play an important role within FISITA, and that your contribution could positively enhance our community's continued commitment to our vision and mission, which is also likely to align with your company's own aspirations and corporate social responsibility programmes.

We invite you to join the global alliance of FISITA and look forward to discussing how we can align objectives and welcome your organisation into membership.

Engineers create solutions; FISITA supports them to do so.

ChangHwan Kim
President, FISITA
Executive Vice President
Hyundai Motor Company

Dr. Mircea Gradu
Chair, Corporate Board
FISITA

Chris Mason
Chief Executive Officer
FISITA

Why FISITA?

The technology of mobility and the rapidly evolving automotive industry landscape are creating many opportunities, and challenges for the international technical community; FISITA exists to enable its members to collectively seek appropriate solutions.

- FISITA actively promotes co-operation with and between its global membership, working in collaboration to develop real-life perspectives and solutions to the challenges and opportunities of the technology of mobility ecosystem.
- FISITA's international alliance enables industry-wide collaboration in the pre-competitive space. It provides a platform for all stakeholders to engage in progressive, expert dialogue to shape the future of the technology of mobility.
- FISITA supports its members to align their technological and strategic priorities, and enables meaningful engagement through effective and efficient thought leadership within its international technology of mobility alliance.
- For FISITA, being 'member-led' is more important than ever. While technology will always remain FISITA's primary focus, we know that strategic considerations inevitably affect us all. We therefore focus on pre-competitive engagement and collaboration in alignment with our members' priorities, ensuring a continuous relevance in the workstreams, topics, and themes of FISITA.
- FISITA offers many benefits to members, which are summarised in this brochure. We encourage discussion with any prospective member as this initial engagement ensures a strong alignment between our organisations from the beginning of our working and professional relationships.

"FISITA is a great and valuable platform to meet and exchange with leading industry peers on the most relevant topics of the mobility industry. By cooperating with colleagues across the whole value creation network on understanding and shaping the trends of our environment, we push the limits of today's and tomorrow's mobility."

Dr. Matthias Klauda
Executive Vice President, ADAS & Compute Solutions
Robert Bosch GmbH

"As Head of Sustainability at NIO, I lead transformative strategies and champion initiatives such as closed-loop recycling under the "Car to Car" model, help shape industry ESG standards and engage with global platforms such as COP29 and FISITA to influence international sustainability priorities, foster cross-industry innovation, and advance a more sustainable future for mobility."

Grace Zang
Head of the Corporate Quality and Sustainability Management Department & Power Quality Department
NIO Inc.

"With extensive experience in Advanced R&D, I hope to apply my expertise to support FISITA and contribute to the continued advancement of the automotive industry. I am committed to serving FISITA's mission, supporting our members, and adding meaningful value to their activities and the broader community."

Hirofumi Inoue
President, Advanced R&D and Engineering Company
Toyota Motor Corporation

FISITA member benefits

- Position your organisation and people within the global technology of mobility alliance of FISITA and connect with international peers, from student to CTO and CEO
- Register your colleagues on the exclusive FISITA Database of Experts, opening access to the network and knowledge of FISITA (to unlimited colleagues within your organisation)
- Enable your experts to engage with their peers, exploring real world challenges and opportunities through the FISITA Expert Group programme
- Connect and engage with international technology leaders and colleagues from industry, academia, national engineering societies, and related mobility stakeholders
- Establish new professional and business relationships while strengthening existing partnerships with members around the world, through digital and in-person engagement
- Enable all your colleagues to freely access and download content from the FISITA Digital Library
- Become a member of your regional forum and learn from peers in Asia, Europe, and the Americas
- Engage with the FISITA Education Committee, Industry & Technical Committee, and Society Committee; keep up to date, and contribute to their programmes of work
- Support the continued professional development of your technology leaders and engineers throughout their career journey
- Shape the future direction and technology of mobility programmes of FISITA
- Influence the technology of mobility agenda as a speaker or curator at FISITA's technology and strategy-focused events:

 <p>FISITA's flagship technology of mobility conference and exhibition</p>	 <p>FISITA's invitational leadership summit</p>
 <p>Annual safety conference delivered in collaboration with China SAE</p>	 <p>The world's largest brake technology conference and exhibition</p>

“As Chair of FISITA’s Circular Economy Expert Group, I am honoured to contribute to a global network of automotive leaders driving sustainability. Our 2026 White Paper, *Driving Circularity: A New Mindset to Achieve Sustainability*, unites international expertise to share best practices—from repair and reuse to recycling—addressing challenges and accelerating circularity across the worldwide mobility ecosystem.”

Sophie Schmidtlin
Chief Technology Officer, Automotive Circular Economy
THE FUTURE IS NEUTRAL

Blended engagement approach

FISITA delivers digital and in-person engagement, aligned with the technological and strategic priorities of FISITA members, enabling effective and efficient peer group engagement, increasing opportunity, value, and benefit, wrapped in a two-year cadence between each World Mobility Conference.

This approach increases engagement for more people from each member organisation, reducing the frequency of travel, while acknowledging the need to be together in-person, with the right people, for the right reason, at the right time.

The FISITA blended engagement approach supports meaningful networking and knowledge-sharing, focusing on real-world challenges and opportunities for technology of mobility professionals. FISITA is leading the way in progressive engagement, evolving and adapting to meet the needs of its community, creating a modern, member-led, international alliance of technology of mobility leaders and engineers.

Digital engagement

- **FISITA Connect** – Available to all FISITA member employees and colleagues, FISITA Connect is your exclusive, member-only digital platform designed for peer-to-peer networking, thought leadership and knowledge sharing.
- **Expert Groups** – The FISITA Expert Group initiative enables international expert peer groups to establish and progress agendas of work via FISITA Connect, aligned with the real-world challenges and opportunities within their area of expertise.
- **Webinars** – The FISITA Webinar Series delivers regular technology of mobility-themed sessions, creating relevant industry thought leadership opportunities on topics of importance, by experts from the international FISITA alliance and FISITA's Expert Groups.
- **Member-only webinars** - Quarterly webinars featuring keynotes and panel discussions available exclusively to employees at FISITA Corporate Member companies and FISITA Society Members.
- **Podcast** – 'Beyond the Car' is the FISITA podcast addressing the technology of mobility. Each episode features conversations with leading engineers and engineering leaders, and respected industry experts involved in the business and technology of mobility.

“Applus+ IDIADA has collaborated with FISITA for over 25 years as a corporate member, actively participating in FISITA congresses and exhibitions including EuroBrake and the World Mobility Summit. This longstanding partnership has fostered global collaboration, enhanced our technical reputation through research paper presentations, and positioned IDIADA as a key contributor to automotive innovation and mobility solutions worldwide.”

Josep M. Farran
CEO
Applus+ IDIADA

In-person events

- Held in Barcelona every two years, WMC is a three-day conference and exhibition that brings together the international community of FISITA and relevant guests, contributors, and stakeholders.
- With a programme of industry-critical topics aligned with the themes of the FISITA Expert Groups and other priority topics as determined by the FISITA membership, delegates can expect to receive high-quality presentations and thought leadership from industry experts on topics such as future mobility systems and solutions, propulsion systems, energy infrastructure, safety, autonomous driving, chassis systems including brakes and tyres, digitalisation, safety, and sustainability.

- The FISITA World Mobility Summit brings together FISITA member leaders in an exclusive, invitational setting and is recognised as the must-attend event in the international mobility systems leadership schedule.
- The Summit serves as a vibrant and unique platform for technical leadership dialogue and exchange, ensuring its ongoing relevance and importance within the global FISITA leadership community, delivering high-level thought leadership and collaboration in a member-led environment.
- Hosted and curated by the current serving FISITA President, each member leader receives two complimentary tickets to this prestigious biennial event.

- Delivered in collaboration with China SAE, the FISITA Intelligent Safety Conference brings together global technical leaders, engineers, and academics to discuss the latest innovative methods, technologies, and solutions in the field of intelligent driving safety.
- The Intelligent Safety Conference features a high-quality line-up of international speakers delivering keynotes and thought leadership on critical intelligent safety strategy and technology topics.

- The world's largest friction and braking conference and exhibition, EuroBrake delivers over 100 technical presentations to more than 1,000 delegates and over 100 exhibitors from across the braking system value chain. Established in 2012, the EuroBrake community gathers annually in the pursuit of thought leadership and knowledge sharing, international peer group engagement, corporate visibility, and professional networking.

FISITA committees

Education Committee

- The FISITA Education Committee is dedicated to advancing mobility engineering education globally. Comprised of leading academics and experts from around the world, this committee works to develop and promote best practices in engineering education, facilitate knowledge exchange, and support students and young engineers – the future generations of leaders and engineers.

Industry & Technical Committee

- Made up of senior engineering leaders, the FISITA Industry & Technical Committee advises and supports FISITA in the development of technical priorities, agendas and content, including the member-led Expert Groups, Digital Library, and events, ensuring that output meets the current and progressive needs and requirements of members.
- Taking a broad view of the mobility ecosystem, the Industry & Technical Committee reviews and responds to current technologies, and explores longer-term industry trends, with a view to actively supporting the development of FISITA Corporate Membership, Society engagement, and member contribution.

Society Committee

- The Society Committee focuses on strengthening the global network of mobility engineering professionals within the FISITA community.
- This committee works to facilitate and enhance member engagement, providing networking opportunities, and delivering collaboration among the national engineering society community across 31 countries.
- The Society Committee enables a vibrant and inclusive community that drives innovation and excellence around a priority agenda which is progressive and aligned with the real-world challenges and opportunities determined and prioritised by national engineering society members.

"No topic is more transformative than skills for the mobility sector. With technology changing faster than ever the need to maintain and grow new capabilities is crucial."

The education committee encourages the development of highly capable, workplace ready next generation mobility engineers. Through connecting world leading institutions, employers and students, the new academic membership model will enable FISITA members to benefit from learning opportunities, and expertise, emerging from some of the world's top universities. I believe that FISITA is able to become the nexus that will drive skills and education in the global mobility sector."

Dr. Benjamin Silverstone
Associate Professor, Head of Skills Policy
University of Warwick

"FISITA is a great community which provides an unparalleled global platform facilitating in-depth exchanges across technology, products, business and culture. FISITA enabled me to be actively involved in accelerating the transformation of the global automotive industry, building a great friend circle through international engagement and peer group collaboration, and benefiting my organisation and my own career. I do encourage all of you to support FISITA through which we can work together to make our industry sustainable."

Prof. Frank Zhao
Professor and Director of Automotive Strategy Research Institute
Tsinghua University

Our members

Corporate members

FISITA is proud to be the international community of choice to many of the leading players within the technology of mobility sector. Our Corporate Membership includes a diverse and evolving network of companies, from vehicle manufacturers and their suppliers to new tech companies and start-ups. In the technology of mobility age, FISITA is home to all involved in the complex landscape of mobility systems.

Member societies

The FISITA Society Member community includes the leading national membership societies from 31 nations around the world, all supporting their local engineering communities in the technology of mobility sector.

All societies are welcome to join FISITA, engage and contribute alongside our Corporate Members, in the shared belief that the technology of mobility is positively changing our world.

FISITA fosters a unique level of pre-competitive global collaboration that is unmatched anywhere else. Its member-led foundation ensures conference and expert group topics are always timely and relevant. The organization's greatest strength lies in its global network of corporate and society members, which has enabled me to build relationships with extraordinary leaders I might never have met otherwise. Serving as FISITA president and as an executive board member for the past six years has truly been an honor and privilege.

Mike Anderson
Vice President, Global Battery & Propulsion Engineering
General Motors

Join FISITA

FISITA is pleased to offer exclusive membership to corporate organisations and engineering societies active within the automotive mobility industry.

By joining FISITA, you will be supporting our international membership alliance to promote knowledge sharing among stakeholders in a way that positively contributes to the development of safe, sustainable and affordable mobility solutions, and helps guide the future direction of the global automotive mobility engineering profession.

For an informal discussion regarding your organisation and FISITA, please contact Kay Saunders, Head of Membership, k.saunders@fisita.com.

“FISITA unites members from 35 countries and regions, emerging as the world’s most extensive professional community for automotive technology innovation and exchange. As the Secretary General of China SAE, we affirm its role in building an open, inclusive platform for global engineers, including co-hosting the FISITA Intelligent Safety Conference (ISC) in China. We look forward to linking the world and forging the future of automotive mobility together through FISITA!”

Fushen HOU
Vice President and Secretary General
China Society of Automotive Engineers (China SAE)

“FISITA provides a unique global platform where industry leaders and experts collaborate, discuss, and shape the future of mobility. Its influential conferences and active expert groups accelerate knowledge exchange, strengthen technical consensus, and inspire innovation across regions. FISITA’s work empowers the automotive community to navigate transformation with greater clarity, connectivity, and confidence.”

Feng Shen (Dr.)
Executive Vice President and Chairman of Quality Management Committee, NIO
NIO Inc.

“I joined FISITA to build strong professional relationships and connect with experts across the automotive industry. FISITA offers a unique platform to exchange ideas, share knowledge, and explore innovative perspectives. Through collaboration and fresh insights, I aim to find new inspiration that drives future developments and supports continuous progress in technology and engineering.”

Andrea Cerutti
VP – Virtual System Engineering
Brembo N.V.
